## ULTRAGLAZE & ULTRAMATT doors & panels

**polytec's** Ultraglaze & Ultramatt doors and panels are an acrylic, premium surface appropriate for residential and commercial joinery. The fingerprint and scuff resistant properties of Ultramatt Premium Matt makes it a suitable option for high-traffic zones, while Ultraglaze Premium Gloss remains an innovative high-gloss finish in the decorative surfaces industry.

Ultraglaze Premium Gloss creates a classic, luxurious feel while remaining a practical design aesthetic. The light reflectance value of Ultraglaze allows for a tastefully modern design with easy to maintain qualities.

Ultramatt Premium Matt is the ultimate pure matt surface in decorative joinery applications. Ultramatt can be integrated into any style owing to the versatile neutral colour range, including solids to subtle metallics. The sense of touch has been elevated in interior environments with an increased specification of handle-free doors with low reflective qualities. This has constituted the desire for a smooth surface appearance with an unsurpassed matt level.

**polytec's** Ultraglaze & Ultramatt are available as fully made-to-order doors and panels. The Ultraglaze & Ultramatt range is available in 18mm E0 MR MDF alongside a host of door profiles such as Aluminum Finger Pull, Bevel Edge, and Square Edge with matching 1mm ABS edgetape.

All Ultraglaze & Ultramatt solid, neutral colours complement the timber patterns in Woodmatt and Ravine ranges for a personalised design. Confidently use one or two colours in your entire joinery for a simple, contemporary statement.

Ultraglaze & Ultramatt offers a top quality, luxurious appearance with easy maintenance and scuff resistant qualities. Incorporating Premium Gloss and Matt finishes into your project is the perfect way to add visual interest to a pared-back, neutral palette.

## ENVIRONMENT & SUSTAINABILITY

polytec is 100% Australian family-owned brand and for over 30 years, we have taken pride in being an Australian manufacturer, with sustainability ingrained in the core of our operations, products, and work practices, shifting towards continual dedication to improving and enhancing our environmental performance. This involves a steadfast reduction of our carbon footprint, minimising waste, optimising energy efficiency, and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All polytec board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

The reDirect Recycling Wood Recovery Initiative services polytec customers by collecting raw and melamine coated particleboard offcuts for reuse. These materials are diverted from landfill and repurposed into new particleboard within our closed loop manufacturing processes, reducing waste and preserving valuable plantation resources.

polytec are striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018 over 46,000 solar panels across the network of facilities have been installed. When installed, the Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

polytec is on a journey – one that places sustainability at the centre of how we design, manufacture, and support our customers. We believe that sustainable practices are the foundation of strong, resilient communities – and we're committed to contributing to a healthier, more sustainable future for all.

## CARE & MAINTENANCE

polytec do not recommend the use of Evolution products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted. Ultraglaze & Ultramatt doors and panels are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

Your Ultraglaze & Ultramatt doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Ultraglaze & Ultramatt doors and panels should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit [www.polytec.com.au](http://www.polytec.com.au) for specific care and cleaning information.

## IMPORTANT

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

Createc and Venette are a painted product and as with many painted materials a slight odour may occur when fresh, or if not permitted to air. The products comply with Green Building Council of Australia. Green Star Design & As Built V1.3 – 13.1.2B & 13.2. Green Star Interiors V1.3 – 12.1.2B for emission of VOCs.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.au](http://www.polytec.com.au).

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [www.polytec.com.au](http://www.polytec.com.au).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and polytec recommend testing a sample for fingerprint resistance and ease of cleaning. polytec does not guarantee exact colour matches across product ranges due to colour variation in each product group.
